Intervention plan

Suggested order of intervention for the unmet criteria. It contains no duration estimates: these depend on the site architecture and on the resources of the assessed entity.

- **Priority 1:** fix first the issues classified as critical (12), which can block access
- **Planning:** include in the development roadmap the fix of 16 WCAG criteria not satisfied, listed in this document
- **Training:** raise awareness of accessibility principles among the development and content teams
- **Value:** accessibility improves the experience for all users

DATE	RESPONSIBLE	TYPE	VERSION	DESCRIPTION
30/09/2026	Principi S.r.l.	First release	**1.0**	Document automatically generated from EAA Scanner accessibility audit
30/09/2026	Principi S.r.l.	Reissue	**1.1**	New issue of the documents of the same scan, with the rendering rules in force

The integer part of the number counts the scans of the site (X.0 = X-th scan); the decimal part counts the reissues of the documents of the same scan (X.1, X.2…).

This document presents a technical accessibility evaluation based on the documented checks and stated limitations. Automated checks cover only part of the WCAG criteria and do not replace human evaluation.
